

SAI KIRAN VULLENGALA

Software Engineering Intern

+91 9701170545 | saikiranvullengala@gmail.com | Open to Remote | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

SUMMARY

Second-year B.Tech Data Science student at IIT Palakkad (CGPA: 8.38/10) with experience building full-stack applications using React, Node.js, and PostgreSQL. Skilled in REST APIs, Supabase Realtime, JWT authentication, PostgreSQL triggers, GitHub Actions CI/CD, and Gemini LLM integration. Strong problem-solving skills with 240+ LeetCode problems solved in C++; built an AI-powered multilingual voice banking assistant at India's largest Agentic AI Hackathon using prompt-engineered conversational flows.

EXPERIENCE

SDE Intern Jun 2026 — Present
Vehant Technologies Work from Home

Technical Team Lead, Full Stack Developer Jul 2025 — Present
IAR Cell, IIT Palakkad India

- Engineered a React dashboard serving 2,000+ alumni records with profile management, event listings, and admin tools including CRUD, search, pagination, and CSV export.
- Accelerated delivery by coordinating a 6-member agile team, integrating 5+ REST API endpoints, and reviewing pull requests to maintain consistent code quality across releases.

EDUCATION

B.Tech in Data Science, Indian Institute of Technology, Palakkad Aug 2024 — Present
CGPA: 8.38/10 Palakkad, India

- Relevant Coursework: Data Structures & Algorithms, OOP, DBMS (PostgreSQL), Artificial Intelligence, Computer Systems

SKILLS

Languages: C++, Python, JavaScript, TypeScript, HTML5, CSS3

Frameworks & Tools: React.js, Node.js, Express, Tailwind CSS, Vite, PostgreSQL, Supabase, Git, GitHub, Vercel

Practices & AI: Agile, CI/CD (GitHub Actions), REST APIs, JWT Auth, Gemini API, Prompt Engineering, LLM Integration

In Progress: Next.js, Docker, OpenAI API

PROJECTS

Aarogya HMS [github](#)

- Built a Hospital Management System in React 19 + Node.js + PostgreSQL with 4 role-based portals (Admin, Doctor, Nurse, Patient) across a 14-table schema, covering workflows from triage to discharge.
- Reduced manual billing effort by ~60% via PostgreSQL triggers and automated invoicing; validated 15+ API routes with Postman across auth, appointments, billing, and room management.

Planora: 2D Interior Design & Blueprinting Suite [github](#)

- Delivered a 2D floor-planning app in React 18 + Vite + Node.js with real-time spatial editing, grid snapping, CAD-like tools, and JSON-based layout persistence — tested with 5 beta users.
- Shipped keyboard-driven editing shortcuts, live room-wise cost estimation, and LAN sharing support, reducing design iteration time across collaborative layout sessions.

Nescafe Online Ordering System, IIT Palakkad [github](#)

- Architected a full-stack digital ordering platform in React + Node.js + Supabase with Razorpay payments and custom OTP auth, targeting queue elimination at the IIT Palakkad campus outlet.
- Built a real-time Admin Command Center via Supabase Realtime (WebSocket) with automated delivery batching and live inventory management for high-concurrency campus usage.

ACHIEVEMENTS & HACKATHONS

- LeetCode:** 240+ problems solved in C++ across Data Structures, Algorithms, and Problem Solving
- Agentathon 2025, Hyderabad** (India's Largest Agentic AI Hackathon) — Built **FinVoice**, a multilingual voice banking assistant using the **Gemini Live API** (gemini-2.5-flash), React 19, and TypeScript; enabled voice-driven transactions in English, Hindi, and Telugu via prompt-engineered conversational flows.
- Adobe India Hackathon 2025** — Participant
